Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Betent No. 6309857
GENERAL INFORMATION:
APPLICAMT: Pauli, Benedicht U.
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chioride Channel-Adhesion Molecules
FILE REFERENCE: 18647.0052
CURRENT FILING DATE: 1998-11-17
PRIOR APPLICATION NUMBER: US/60/065,922
PRIOR FILING DATE: 1997-11-17

Publication No. US20030109690A1

GENERAL INFORMATION:

HILD REPREMENT: Ruben et al.

TITLE OF INVENTION: Colon and Colon Cancer Associated Polynucleotides and Polypeptides

PILE REPREMENT: PA0051:

CURRENT APPLICATION NUMBER: US/10/106,698

CURRENT FILING DATE: 2002-03-27

PRIOR FILING DATE: 2000-09-28

PRIOR PLING DATE: 1999-09-29

PRIOR APPLICATION NUMBER: US 60/157,137

PRIOR FILING DATE: 1999-11-03

PRIOR FILING DATE: 1999-11-03

NUMBER OF SEQ ID NOS: 8564

SEQ ID NO 6388

LENGTH: 869

Sequence 28, Application US/10055412B

Publication No. US2030059861A1

GENERAL INFORMATION:

TAPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Numbers US/10/055,412B

CURRENT FILING DATE: 18617-0058

CURRENT FILING DATE: 1998-11-17

PRIOR FILING DATE: 1998-11-17

NUMBER OF SEQ ID NOS: 47

SEQ ID NO 28

LENGTH: 914

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 28, Application US/09193562D
Patent No. 6309857
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT FILING DATE: 1998-11-17
                                                                  Sequence

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 34,

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
